

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

2. Requirements

Functional Requirements

- The solution shall use ServiceNow Flow Designer.
- The flow shall be named “Standard laptop task”.
- The flow shall use the Global application and System user.
- The trigger shall be Service Catalog.
- The action shall be Create Catalog Task.
- The Requested Item Record shall populate the Request item.
- The catalog task short description shall be “Laptop need to Configured”.
- The description shall be set to “Laptop need to Configured”.
- The Assignment group shall be Hardware.
- The Approval value shall be Approved.
- The flow shall be saved and activated.
- The Standard Laptop catalog item shall use the created flow through its Process engine configuration.
- Users shall be able to place a Standard Laptop order through Service Catalog and obtain approval.

User Story

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the hardware team for configuration.

Non-Functional / Outcome Requirements

- Reduce user waiting time.
- Minimise manual intervention.
- Improve resource utilisation.
- Improve procurement efficiency and productivity.

Requirements Not Explicitly Specified

Specific performance targets, SLAs, security requirements, availability targets, team details, and quantified acceptance thresholds are not provided in the source PDF.

Source basis: the supplied 10-page Project 2 PDF. Fields not supported by the source are explicitly identified as not provided.
