

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

5. Testing & Validation

Test Case 1 – Standard Laptop Order

- Open Service Catalog → Hardware → Standard Laptop.
- Click Order Now.
- Expected: The Standard Laptop request is created.

Test Case 2 – Approval

- Open the request and navigate to the Approvers section.
- Approve the request as described in the source.
- Expected: The requested item proceeds through the configured process.

Test Case 3 – Catalog Task Creation

- Open the Requested Item record.
- Scroll to Catalog Tasks.
- Expected: A Catalog Task is present after the approved request is processed.

Test Case 4 – Task Values

- Open the Catalog Task.
- Verify the short description is “Laptop need to Configured”.
- Verify the task is assigned to the Hardware group.
- Expected: The documented values are updated on the task.

Test Evidence

The source PDF describes the verification procedure but does not provide quantified execution results, screenshots, defect IDs, response-time measurements, or a formal pass/fail test log. Those should be added from the actual ServiceNow instance if the submission template requires them.

Source basis: the supplied 10-page Project 2 PDF. Fields not supported by the source are explicitly identified as not provided.
